EXPERIENCE

2024 - Present

Senior Product Designer

Tenscope - London, Remote

- Currently leading the development of an innovative solution for Get Credit Help platform.
- Building features for Datarova, driving platform improvements and elevating user experience.
- Redesigning Viafoura's message, live chat, and notification widgets used by millions of users.

2023 - 2024

Senior Product Designer

gourban - Vienna, Banjaluka

- Played a key role in Austria's OBB Rail and Drive project, securing a €3M investment.
- Led the design and development of the new website in Webflow, increasing user conversions.
- Aligned Storybook with Figma design system, improving development handoff and collaboration.
- Organized and optimized inherited Figma files, improving development handoff and collaboration.
- Created a new design system architecture for White-labeling, improving the handling of new projects and securing future investments.

2021 - 2023

Product Designer

HTEC - Banjaluka

- Successfully designed and launched the Gluware platform, enabling users to create public and private workflows with role-based access control, securing $43 million in funding in 2021.
- Developed a comprehensive Gluware design system and a cleaner UI design, earning recognition and respect from peers.
- Entrusted with leading the development of the Reusable Design System to establish a unified design language across HTEC and foster collaboration among designers. Increased efficiency and delivery in product development processes.
- Implemented a comprehensive Design System for Tally Solutions within a tight timeframe.
- Designed an enterprise project for ADP, delivering a machine learning dashboard.

2022 - 6 months

Product Designer

b2match - Vienna, Zagreb - part-time

- Delivered all three major projects on time.
- Built prototypes and user flows to simulate the complete user experience, collaborating with the development team to successfully deliver the Entrance Mobile App within a two-month deadline.
- Designed the b2match Next platform in four months, enhancing the client's service offerings.
- Designed the b2match Landing Page Builder in parallel, aligning with the client's vision.

2020 - 2021

Product Designer

VIVANT and Château de Pommard - Paris, Banjaluka

- Launched a multifaceted platform for live and pre-recorded wine-tasting experiences, driving wine sales through Salesforce integration.
- Designed an intuitive interface and visually captivating pages that facilitated easy browsing and selection of wine-tasting sessions, featuring compelling imagery, descriptive text, and interactive elements.
- Developed a widget-like interface for user flexibility and an immersive experience, along with the Live Session Mobile App Beta.

2016 - 2020

Product Designer

OROUNDO Mobile GmbH - Vienna, Banjaluka

- Launched a redesigned Cultural Places App based on user feedback and developed a Back Office App for ticket management from scanning to validation.
- Designed Oroundo Systems, attracting €1M in investment and resulting in the shipment of 100 cases to museum partners, boosting Media Guides sales by 50%.
- Developed advanced beacon technology using energy harvesting and superconductors for autonomous operation.
- Collaborated with prestigious museums and exhibitions to create print materials, ensuring timely delivery and integrated content for the app.
